

TERMINAL SEVIQC PLATFORM

The Terminal Seviqc platform is an independent subpage of the Seviqc Brežice website (Tourism webpage). This information platform will showcase the appealing tourism and cultural products and services of the Seviqc Brežice festival locations. It is intended for both, those that are not well familiar with Slovenia, and as an additional recommendation to those that know their way around the country better.

The objective of Terminal Seviqc is not to compete in the tourism products market as an additional facilitator. Rather the goal is to assert itself as a referential information source for the international public interested in culture tourism. The platform presents the festival locations' abundance of tourism products and services and their originality. In addition, we are recommending selected providers who are not categorised according to festival location but who, as our business partners, are also interesting for festival visitors.

Products and services are added on the Terminal Seviqc platform on the basis of the festival's business experience and recommendations from local tourism workers and transnational networks. The platform brings together the following content for each festival location:

- Festival venue
- Tourist information centre
- Hotels and other accommodation
- Restaurants and cuisine
- Winemakers
- Health resorts
- Museums, art galleries and cultural heritage
- Festivals and cultural events
- Natural sites and destinations
- Transport providers and tourist agencies
- Walkways, cycle routes

The Terminal Seviqc platform highlights the products and services of locations where the Seviqc Brežice festival has found sufficient support to carry out its events. In the first stage we are including festival locations from 2016. Later, locations will gradually be confirmed for a new period and new ones added by midyear of the following year: the locations of 2016 will be included by 30 June 2017, the locations confirmed in 2017 by 30 June 2018, etc.
