It was built on the site of an old Roman settlement Civitas Negotiana, on the intersection of roads leading to present-day Maribor, Celje and Ptuj. Slovenska Bistrica was granted town rights in the beginning of the 14th century. Today it is a modern Slovenian town, which has successfully developed in various fields during the last decades. Originally the property of the provincial prince, it became private property in 1578, when it was bought by the Vetter von der Lilie family. Towards the end of the 17th century, the Wildenstein family took over the castle, and in 1717 it was bought by the Counts of Attems, who managed it until 1945. Since 1985, the castle has been carefully renovated.
